The Powerstation features 1-Click Pull down sidepanel technology for easy access to your components and motherboard without taking apart your whole system, and not to mention the motherboard tray is removable!

A side strut bar keeps your system stable and balanced while cooling and locking in your PCIE/AGP/PCI components.

Front mounted green LED "teeth" lights up your front panel.

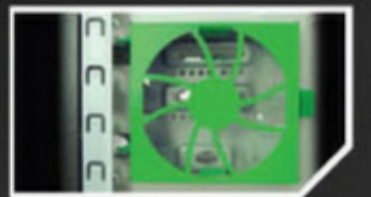

A built-in EZ slide tool box is included to keep your extra screws and small accessories!

Click-Lock tool-less technology allows easy installation of hard drives, dvd-rws, cd-roms, and many other peripherals.

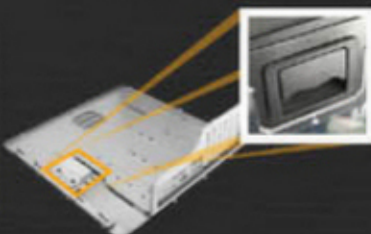

80 mm green LED fan keeps your system cool and looking great!

Additional fan mounts for hard drive cooling!

Front mounted USB 2.0 and audio ports.

1-Click removable motherboard tray for easy access.
