## POWERSTATION

# RECOM™

www.recom.nl

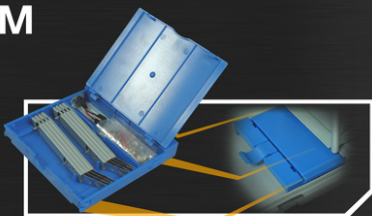

The Powerstation features 1-Click Pull down sidepanel technology for easy access to your components and motherboard without taking apart your whole system, and not to mention the motherboard tray is removable!

A side strut bar keeps your system stable and balanced while cooling and locking in your PCI-E/AGP/PCI components.

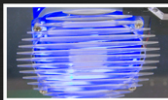

Front mounted blue LED "teeth" lights up your front panel.

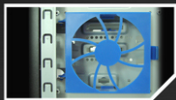

A built-in EZ slide tool box is included to keep your extra screws and small accessories!

Click-Lock tool-less technology allows easy installation of hard drives, dvd-rws, cd-roms, and many other peripherals.

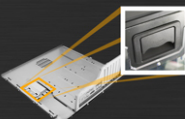

80 mm blue LED fan keeps your system cool and looking great!

Additional fan mounts for hard drive cooling!

Front mounted USB 2.0, audio ports, and Mirror-Shine paint.

1-Click removable motherboard tray for easy access.
